SINCE 1964

# Pumps **variable-speed**

EXTREMELY QUIET. SAVINGS. FILTRATION QUALITY.

## QUIETER

Great acoustic comfort, thanks to pumps that rotate more slowly while filtering, as high speeds are used only for backwashing.

## UP TO 85% SAVINGS ON YOUR ELECTRICITY CONSUMPTION

The total volume of pool water must be renewed at least 3 times a day and is the most expensive energy-consuming item in a pool. That is why Hayward continues to innovate with its variable-speed pumps.

Principle: water circulates continuously at low speed. Result: **electricity consumption is reduced by up to 85%\***.

## MORE EFFICIENT

Thanks to their 24-hour operation:

- slower speed through the filter increases filtration efficiency,
- the other equipment (heating, electrolysis, etc.) always operates at optimum performance,
- quieter and more reliable.

\*Energy savings of at least 65% are generally achieved.

## SIMPLE

... to install, even in the case of a renovated pump. And the user interface provides access to information and allows **intuitive control of its 3 speeds on a day-to-day basis:**

- 1 **Low filtration speed:** for normal 24-hour operation
- 2 **High filtration speed:** to clean up green water or to operate a suction cleaner
- 3 **Fast speed:** for maintenance operations (cleaning the sand filter, draining the pool, priming, etc.)

Rotary box for easy access to the interface in very small equipment rooms.

## CHOICE

5 models for different pool sizes and types:

	m <sup>3</sup>	Models <sup>(1)</sup>
Small pools and above-ground pools	up to 50 m <sup>3</sup>	<b>Max-Flo XL™ VSTD 1 CV</b>
Medium-sized pools	up to 65 m <sup>3</sup>	<b>Max-Flo XL™ VSTD 1,5 CV</b>
Medium-sized pools	up to 80 m <sup>3</sup>	<b>K-Flo VSTD 1,5 CV</b>
Large pools	up to 100 m <sup>3</sup>	<b>TriStar® VSTD 1,5 CV</b>
Large pools	up to 120 m <sup>3</sup>	<b>TriStar® VSTD 2 CV</b>

<sup>(1)</sup> VSTD : T for Timer allowing you to program the operating time directly on the pump. D for Digital allowing you to connect external devices (heat pumps, roll-up cover, etc.).

## EXPERT LINE

GOOD TO KNOW

In summer, on average, **45% of the electricity bill represents the cost of operating a pool.** Thanks to the electricity saved by using a variable-speed pump, **the cost of the pump is recouped in 3 seasons!**

A variable-speed pump
